

When will the time come when groups like the NAB stop trying to eliminate services that are far better and offer much variety than they ever will. XM and sirius go with you everywhere you go and dont go to complete fuzz in the most rural of areas if XM wants to give localized content so be it why must it be a problem? It seems the NAB wants to to take a step back at the expense of people losing localized content just because they cant compete with XM or sirius as an XM subscriber I urge you to reject any proposal to limit choices for consumers I never listen to fm or am radio anymore because its not even on the same page as XM I cant wait for localized content to arrive to the harrisburg metro area thank you for letting me voice my opinion and please reject petition 04-160 or anything similar to it that limits choice
